***October, 2000***

THE RI JUSTICE COMMISSION ↔ STATISTICAL ANALYSIS CENTER

## **2000 Rhode Island State and Municipal Law Enforcement Technology Survey**

The Rhode Island Justice Commission is pleased to release the results of the first *State and Municipal Law Enforcement Technology Survey*. The survey is designed to obtain information from law enforcement agencies regarding the use of computer technology. In turn, that information can be shared and “best practices” duplicated throughout the community. This survey will be an annual undertaking by the Justice Commission.

In 2000 Rhode Island law enforcement agencies made significant technological improvements in their computer operating capabilities. Many departments are now equipped with state of the art internal networks, mobile data terminals, and digital mugshot and fingerprint equipment. These improvements on the local level augment the multi-year state Justice Link (J-Link) project. Ultimately, J-Link will provide an integrated data sharing system between local law enforcement and state criminal justice agencies.

It is noteworthy to emphasize that support from the Rhode Island Police Chiefs Association has made J-Link a reality. The new message switcher, upgrades to the Rhode Island Telecommunications System (RILETS) and the replacement of antiquated court records management software would not have been possible without a percentage waiver of your local pass-through funding from the Edward Byrne Memorial State and Local Law Enforcement Assistance Program.

The Justice Commission appreciates your continued interest and support in the programs we administer and we look forward to further assisting your agencies as together we strive to improve the criminal justice system in Rhode Island.
